SUBSTRATES AVAILABLE

Optolite™ Light Control Film is available in :-

Glass

Polycarbonate

Optolite HSR (CR39)

All available with non-glare or anti-reflective coatings to enhance readability depending on the lighting environment the display is in.

Specifications

Optolite™ Light Control Film (LCF) is a thin plastic film, 0.81mm - 0.86mm thick, containing closely spaced black micro-louvres. The film simulates a tiny venetian blind to shield out unwanted ambient light and direct light of electronic instrumentation.

Surface Finish

Matte - abrasion and solvent resistant finish for use on exposed surfaces

Sheet Size: 254 x 305mm and 330 x 432mm.
